

Eric Huang

Site Reliability Engineer

Certified Kubernetes Administrator, open source enthusiast, and conscientious software engineer with skills in automation, observability, and cloud-native solutions. Possesses strong problem-solving abilities and a keen eye for detail, aiming to improve system reliability, observability, and efficiency.

Work Experience

Site Reliability Engineer *Engineering Dept., LINE Taiwan Limited*

📅 Dec. 2022 – Present 📍 Taipei, Taiwan

- Co-maintained organization-wide internal Terraform provider terda, and promoted Terraform adoption and advocacy at LINE Taiwan.
- Optimized log collecting pipelines at LINE Taiwan, and profiled and tuned the self-hosted Loki, reducing storage overhead by **80%** and cutting down required resource by **70%**.
- Introduced Grafana Alloy and Faro SDK at LINE Taiwan, achieving end-to-end tracing, RUM, and presented the work at COSCUP 2024.
- Designed and developed automation tools such as slack-based workflow automation framework and GitHub Action to improve operational quality.
- Designed and built internal infra cost calculator, metrics snapshotter, and dashboards, providing private cloud spending visibility and optimization.

Senior Engineer *Intelligent Banking Division, E.SUN bank*

📅 May 2021 – Dec. 2022 📍 Taipei, Taiwan

- Designed & built up a robust monitoring/alerting system that collect **15+** GB metrics per day across **100+** servers.
- Experienced in Kubernetes administration & cluster and service migration for **8** cluster (**60+** nodes) with **95%** & **99%** SLA.
- Adopted automation tool to construct **production-grade** and **GPU-accelerated** k8s cluster, and contributed to upstream Kubespray & backported to existing playbook.
- Developed tools for automating process of daily routine, config management, app deployment, and system validation task, which lead to effectively reduce operational costs.

Engineer *Computer Integration Manufacturer, tsmc*

📅 Oct 2020 – Jan 2021 📍 Hsinchu, Taiwan

Projects

Rust Playground with WASM

- Forked Rust Playground to render Web Assembly from compiled Rust, and managed to render them on mdBook as well.

Court Reserver

- Rust CLI program for Taipei Metropolitan court reservation, runs in the concurrency way to avoid manual operation on APP.

Skills

Programming

Python • Golang • Rust

Technologies

Kubernetes • Containerization • Nvidia

Cloud-Native tech • Linux SysAdmin •

TCP/IP • Observability • ArgoCD

IaC, CI/CD

Github Actions • Terraform • Ansible

Education

MEng

Data Science

📅 2018 – 2020 📍 National Chiao Tung Univ.

BSc

Computer Science

📅 2014 – 2018 📍 Yuan Ze Univ.

Articles

- Grafana Alloy Best Practice

- Buddy System

Contributions

Enhanced VRL functions and Vector's components

📍 vector.dev/vrl, vector.dev/vector

Reduced redundant calculation in backpropagation

📍 [pytorch/pytorch](https://pytorch.org/pytorch), [jax-ml/jax](https://jax-ml.org/jax)

Fixed Golang's map bucket iteration in eBPF

📍 [grafana/beat](https://grafana.com/beat)

Awards & Certs

- LINE Dev Governance Best Practice
- Certified Kubernetes Administrator
