# Eric Huang

### Site Reliability Engineer

Certified Kubernetes Administrator, open source enthusiast, and conscientious software engineer with skills in automation, observability, and cloud-native solutions. Possesses strong problem-solving abilities and a keen eye for detail, aiming to improve system reliability, observability, and efficiency.

# **Work Experience**

#### **Site Reliability Engineer**

Engineering Dept., LINE Taiwan Limited

Dec. 2022 - Present

- 🗣 Taipei, Taiwan
- Co-maintained organization-wide internal Terraform provider <u>terda</u>, and promoted Terraform adoption and advocacy at LINE Taiwan.
- Optimized log collecting pipelines at LINE Taiwan, and profiled and tuned the self-hosted Loki, reducing storage overhead by 80% and cutting down required resource by 70%.
- Introduced Grafana Alloy and Faro SDK at LINE Taiwan, achieving end-to-end tracing, RUM, and presented the work at <u>COSCUP 2024</u>.
- Designed and developed automation tools such as slack-based workflow automation framework and GitHub Action to improve operational quality.
- Designed and built internal infra cost calculator, metrics snapshotter, and dashboards, providing private cloud spending visibility and optimization.

#### **Senior Engineer**

Intelligent Banking Division, E.SUN bank

May 2021 - Dec. 2022

- Taipei, Taiwan
- Designed & built up a robust monitoring/alerting system that collect **15**+ GB metrics per day across **100**+ servers.
- Experienced in Kubernetes administration & cluster and service migration for 8 cluster (60+ nodes) with 95% & 99% SLA.
- Adopted automation tool to construct production-grade and GPU-accelerated k8s cluster, and contributed to upstream <u>Kubespray</u> & backported to existing playbook.
- Developed tools for automating process of daily routine, config management, app deployment, and system validation task, which lead to effectively reduce operational costs.

#### Engineer

Computer Integration Manufacturer, tsmc

🗖 Oct 2020 – Jan 2021

Hsinchu, Taiwan

## **Projects**

#### Rust Playground with WASM

• Forked <u>Rust Playground</u> to render Web Assembly from compiled Rust, and managed to render them on <u>mdBook</u> as well.

#### **Court Reserver**

• Rust CLI program for Taipei Metropolitan court reservation, runs in the concurrency way to avoid manual operation on APP.

#### **Skills**

#### **Programming**

Python • Golang • Rust

#### **Technologies**

Kubernetes • Containerization • Nvidia Cloud-Native tech • Linux SysAdmin • TCP/IP • Observability • ArgoCD

#### IaC, CI/CD

Github Actions • Terraform • Ansible

#### Education

#### **MEng**

Data Science

**2018 - 2020** 

National Chiao Tung Univ.

#### **BSc**

**1** 2014 – 2018

Yuan Ze Univ.

Computer Science

### **Articles**

- Grafana Alloy Best Practice
- [transl.] Terraform for Verda A journey of Infrastructure as Code for our private cloud
- The Journey to the Kubernetes Networking
- The Journey to the Kubernetes metrics
- Auto Differentiation
- Buddy System

### **Contributions**

# Enhanced VRL functions and Vector's components

• vectordotdev/vrl, vectordotdev/vector

# Reduced redundant calculation in backpropagation

• pytorch/pytorch, jax-ml/jax

# Fixed Golang's map bucket iteration in eBPF

grafana/beyla

# **Awards & Certs**

- LINE Dev Governance Best Practice
- Certified Kubernetes Administrator
