

Eric Huang

Systems Development Engineer

Senior SRE with 5+ years of experience in distributed systems. Skilled in Go and Python. Architected GPU-accelerated Kubernetes clusters and custom Terraform providers. Active contributor to eBPF and Observability ecosystems. Certified Kubernetes Administrator (CKA) certified, [Grafana Champion](#).

Work Experience

Sr. Site Reliability Engineer

Engineering Dept., LINE Taiwan

📅 Sep 2025 – Present

📍 Taipei, Taiwan

- Architected and maintained a custom Terraform provider to automate life-cycle management for a large-scale private cloud platform [Flava](#).
- Developed Kustomize and ArgoCD plugin for managing secrets in the internal KMS and secret manager systems, enhancing security and compliance.
- Designed and implemented a client-agnostic Go SDK for Flava services, utilizing automatic code generation and consistent log formatting to provide a robust, idiomatic interface similar to the AWS SDK for Go.

Site Reliability Engineer

Engineering Dept., LINE Taiwan

📅 Dec 2022 – Sep 2025

📍 Taipei, Taiwan

- Designed and optimized high-throughput observability pipelines for terabyte-scale telemetry data, achieving a **300% increase** in ingestion performance through [pipeline refactoring](#) and [Loki configuration tuning](#).
- Co-maintained the organization-wide [internal Terraform provider Terda](#) and its community as part of a volunteer group. Pioneered Terda adoption at LINE Taiwan and actively advocated for Terraform usage.
- [Implemented a Grafana Alloy gateway](#) to distribute large volume client-side telemetry data sent by Faro SDK, enabling real user monitoring (RUM) and correlating frontend apps with existing observability solutions.
- Created automation tools, including a Slack workflow automation framework and GitHub Actions, to improve operational efficiency and quality.
- Designed and implemented an internal infrastructure cost calculator and dashboards, providing spending visibility and enabling cost optimization.

Senior Engineer

Intelligent Banking Division, E.SUN Bank

📅 May 2021 – Dec 2022

📍 Taipei, Taiwan

- Designed and built a robust monitoring/alerting system that collected **15+ GB** of metrics daily across **100+ servers**.
- Engineered **production-grade, GPU-accelerated** Kubernetes clusters for AI workloads; optimized hardware-software integration by contributing upstream fixes to [Kubespray](#) to improve cluster reliability

Projects

[Rust Playground with WASM](#)

- Delivered a full-stack solution for the [Rust Playground](#), enabling interactive WebAssembly rendering in the browser and integrated it into [mdBook](#).

[Court Reserver](#)

- Developed a Rust CLI program for Taipei Metropolitan court reservations, enabling concurrent reservations to avoid manual operations on apps.

Skills

Programming

Python • Go • Rust

Technologies

Kubernetes • Containerization • Linux
SysAdmin • TCP/IP • Observability •
ArgoCD

IaC, CI/CD

GitHub Actions • Terraform • Ansible

Education

MEng

Data Science

📅 2018 – 2020

📍 National Chiao Tung Univ.

BSc

Computer Science

📅 2014 – 2018

📍 Yuan Ze Univ.

Talks & Articles

- [Upgrading Loki with a Canary Deployment @ COSCUP 2025](#),
- [Grafana Alloy Best Practice @ COSCUP 2024](#),
- [The Journey to the Kubernetes metrics @ K8s summit 2021](#),
- [\[transl.\] Terraform for Verda - A journey of Infrastructure as Code for our private cloud](#)
- [The Journey to the Kubernetes Networking](#)
- [Auto Differentiation](#)
- [Buddy System](#)

Contributions

Enhanced VRL Functions and Vector Components

📍 [vectordev/vrl](#), [vectordev/vector](#)

Support JSON-RPC in Go uprobe eBPF Instrumentation

📍 [open-telemetry/opentelemetry-ebpf-instrumentation](#)

Reduced Redundant Calculations in Backpropagation

📍 [pytorch/pytorch](#), [jax-ml/jax](#)
